**New BIGFOOT Mille LK 900E Gear Driven Dual Action Polisher**

---

**Power and efficiency with the maximum control**

---

Say hello to the latest addition to the wide range of RUPES random orbital and rotary polishers: the Gear Drive Dual Action Polisher **BIGFOOT Mille LK 900E**.

The Mille, belonging to the BIGFOOT family of polishing tools, provides an optimized balance of power, ergonomics, efficiency and capability for operators who crave a gear driven solution. The **BIGFOOT Mille** delivers powerful defect removal, versatility, and consistent performance in an ergonomic package, designed with operator comfort and efficiency of work in mind. The **revolutionary clockwise rotational movement** allows increased levels of control and comfort for the operator. This feature distinguishes the Mille from the competitive tools which often featuring a counter-clockwise movement that is known to increase unwanted lateral movement and create operator fatigue.

The new BigFoot Mille LK 900E includes a **progressive trigger** to provide more precise control of speed through the entire range. The trigger, together with the **variable speed dial**,

allows the operator to deliver the exact desired tool speed and to adjust quickly as needed, without interrupting the polishing process. Every aspect of the Mille has been considered in the design, even when the tool is not being used. Two **rubber supports** are positioned on the body of the machine to keep it stable when resting on a table or cart. The new **extra long 9 meter cord**, included as standard on the LK 900E, allows for better maneuverability within a work space, saving valuable steps and eliminating the hassle of extension cords. The RUPES BigFoot Mille also allows the use of two different pad diameters, 125mm and 150mm, making the new polisher incredibly versatile for numerous polishing operations. The backing pad system has been carefully engineered to maintain the same low vibration performance regardless of the diameter of the backing pad installed.

As with all the BigFoot family of polishers, the new Mille LK 900E Gear Driven Dual Action Polisher is offered as a complete polishing system. Newly designed foam profiles, revolutionary new wool pad technology, and two completely new polishing compounds, all designed to work in harmony with the unique movement of gear driven dual action polishers have been developed and manufactured in house by RUPES.

This latest machine from RUPES adds yet another dimension and increased versatility to the growing line of BigFoot polishing tools.
